PROJECT

INTRODUCTION | *description without requirement details*

A multiplayer mobile experience for players to develop an appreciation for the difficulties in making complex health policy decisions as a responsible authority.

BACKGROUND | *project context. why is the project necessary?*

The data can be valuable to authorities to deduce patterns in policies set out to the public, to better understand the people's health needs. It spreads the awareness of the complexities in making these decisions to the public which aims to reduce the amount of disease.
